Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The Abstract contains the legal phraseology "means".

The drawings are objected to because the reference numeral 1 mentioned on page 7, line 15 does not appear in Figure 1 as is stated. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If

Art Unit: 3651

the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-21, 24-28 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Feldl (U.S. Patent 5,096,045).

Feldl shows at least two modules 12a and 12b having an operating position and a transportation position. Shown is an automated transferring device 38 for transferring items from one end to an opposite end. Figure 3 shows a transferring mechanism of one module can be connected to a transferring mechanism of a neighboring module as they are brought into an operating position. The modules may also be disengaged and transported.

Re claim 17, the sides 13 are fully capable of fixing a support above surface 28.

Re claim 18, shown is a bridge mechanism 45.

Re claim 19, once in place bridge mechanism 45 serves as an automatic coupling mechanism.

Re claim 20, the modules are manually placed into the bridge mechanism.

Re claim 21, shown is a single motor 11.

Art Unit: 3651

Re claim 24, once apart the modules are fully capable of being folded.

Re claim 25, modules can be disconnected.

Re claim 26, shown are legs 14 and 15.

Re claim 27, it is inherent that conveyors may be cleaned if used in an environment that requires it.

Re claim 28, the working surface can be disinfected of so desired from an outside source.

Re claim 30, the sides are fixing means as is broadly claimed.

Claims 22, 23 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James R. Bidwell whose telephone number is (571)272-6910.
